SECURITY IS HARD TO LEARN

Guard Dog Diary

A guard dog who learns attacks and grows while you watch.

Security news feels scary and confusing for beginners. Guard Dog Diary turns it into a friendly dog who patrols the world for you.

- Beginners don't know where to start with security
- Meet Pochi, a trainee guard dog with a red bandana

02

Watch Pochi patrol the map

Pochi runs around a world map on his own. When he finds a threat, he reports it and you decide what to do.

- Press Start and Pochi runs to glowing dots on the world map
- Each report shows where the problem is, how urgent it is, and how to fix it
- Choose "Fix it" or "Watch" and earn XP
- Found threats become stickers in the Threat Book

03

Learn by watching him grow

As you answer reports, Pochi levels up and earns reward stickers. You learn real security habits along the way.

- Pochi changes his look: sunglasses, cape, headset, crown
- A diary notebook records every choice you made
- Simulated attack news gives Pochi extra XP
- Next idea: pick a start point for each patrol
